Dear: Ms. Wright:

This letter is in response to the "Notice of Tentative Decision to Approve No. M/001/027", in the matter of a tentative decision to approve a mining and reclamation plan for Pearl Queen Perlite Corporation's Pearl Queen Perlite Mine, Beaver County Utah.

I am an archaeologist in the state of California, but I am familiar with the archaeology of the Bailey Ridge area around the Pearl Queen Mine (I am the granddaughter of Edward Schoo, who first opened and operated that mine). I still maintain my family home in Milford, where I spent summers as a child in the early 60's wandering the hills with my grandfather (a self-taught prospector and miner). Over the past several years, I have conducted reconnaissance work on my own in that area, in preparation for a Ph.D. project in archaeology on the prehistoric obsidian quarries on Bailey Ridge.

I've obtained copies of some of the reports on the area from the Kern River Pipeline project, which runs through the Milford Valley at the base of the Mineral Mountains. This work focused primarily on the pipeline right-of-way at the base of the Mountains, and did not cover the prehistoric quarry sites that I've identified on Bailey Ridge.

Last year, I visited Barbara Frank, of Southern Utah University in Cedar City, to go over the maps and archaeological records of the area. It appears that the prehistoric quarry area directly south of the area designated as "Mining Area (Years 1-3)" on a map provided by Danny Gatten of Pearl Queen Perlite Corporation, though generally known about, has never been officially recorded as a prehistoric obsidian quarry site. In addition, I have identified large prehistoric quarry and habitation areas further up Bailey Ridge toward the source vent of the perlite and obsidian flow.

I am formally requesting copies of pertinent Environmental Impact Reports and any cultural resource assessments, particularly

0007

archaeological assessments, detailing what measures have been taken to comply with Section 106, federal regulations and the State of Utah antiquities laws on this area for this mining development. During my meeting with Danny Gatten on May 19th, 1997, in Milford, it appeared to me that these items have not been addressed and that the archaeological value of the Bailey Ridge area has been missed or overlooked. It is possible that the mining development of this area could irrevocably damage the prehistoric quarries, lithic reduction areas and habitation sites if a thorough cultural resource mitigation study has not been conducted.

Sincerely,

Mari A. Pritchard Parker, M. S.
Archaeologist
